BUSINESS REVIEW AND PROSPECTS

Information Technology Holdings

Chinasoft is an associate of the Group listed in the Growth Enterprise Market (Stock code: 8216). Chinasoft has recorded a net loss of RMB66,593,000 for the year ended 31st December 2006. However, the reason for Chinasoft to jump from profit to loss is mainly due to two exceptional items which include an amount of RMB110,558,000 of the effect of adoption of Hong Kong Accounting Standard 39 "Financial Instruments: Recognition and Measurement" HKAS39 in relation to redeemable convertible preferred shares and another amount of RMB10,764,000 of the issuing expenses for redeemable convertible preferred shares. If the two exceptional items totaling RMB121,322,000 were deducted from the Audited Loss attributable to Shareholders of RMB66,593,000 as per the annual result, the adjusted annual result would be RMB54,729,000 in profit rather than a loss.

Comparing the adjusted annual result for the year ended 31st December, 2006 of RMB54,729,000 (audited loss add back exceptional items) to annual result for the year ended 31st December, 2005 of RMB39,656,000 net profits a growth of 38% rather than a severe loss was achieved.

The year of 2006 saw Chinasoft consolidated its leading position in providing e-Tobacco and e-Audit solutions and we also saw rapid growth in IT outsourcing services. There were also several successful acquisitions in 2006 and with the announced merger and acquisition with Hinge Global Resource Inc. scheduled to be completed in 2007. Chinasoft will scale up its operations further and we shall see rapid growth in 2007.

Industrial Holdings

For the industrial division, Jiangsu Bang Bang Silky Fashion Manufacturer Company Limited (the "Jiangsu Bang Bang") records a slight decrease in sales of 4% approximately to RMB34.21 million (2005: RMB35.62 million) over last year. Currently, Japanese customers purchased majority of its products and a weak Japanese Yen (the "YEN") will discourage our customers from increasing orders. YEN has stayed weak throughout 2006 and to reduce impacts from currency fluctuations in 2007, Management has spent effort in expanding sales in PRC market.

Property Division

Rental incomes were increased by 19% approximately to HK\$1.03 million in 2006 (2005: HK\$0.86 million). It was attributable to rental income contribution from Kwai Cheung Fa Yuen at Kwai Chung. In view of the steady rise of property market in Hong Kong, management is optimistic that property division will maintain steady incomes and cash flow.

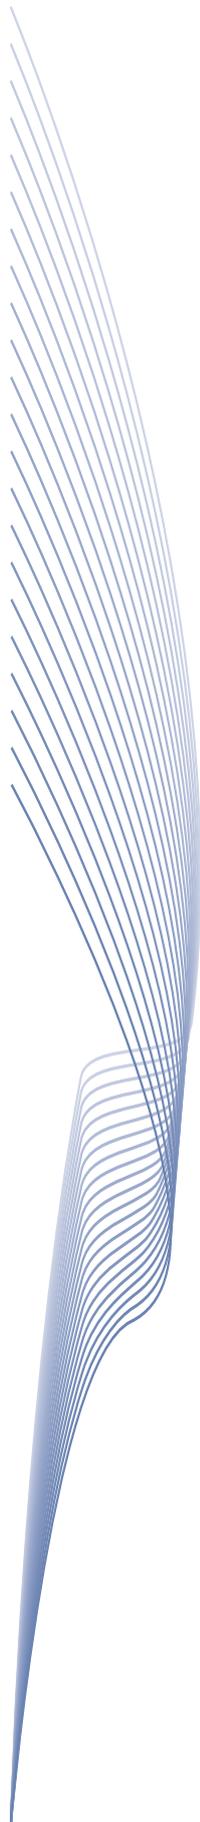

OUTLOOK

The Company has changed its name from Far East Technology International Limited to Far East Holdings International Limited on 27 February, 2007. The board believes that this action is necessary and that the new company name will more appropriately represent the Group's business nature. The management will continue to spend our best efforts to search for investment opportunities in the Greater China region and optimise returns for our shareholders.

3. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared on the historical cost basis except for certain properties and financial instruments, which are measured at fair values, as explained in the accounting policies set out below.

The financial statements have been prepared in accordance with the Hong Kong Financial Reporting Standards ("HKFRSs") issued by the HKICPA. In addition, the financial statements include applicable disclosures required by the Rules Governing the Listing of Securities on the Stock Exchange and by the Companies Ordinance. The principal accounting policies adopted are below:

Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and its subsidiaries. Control is achieved when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The results of subsidiaries acquired or disposed of during the year are included in the consolidated income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by other members of the Group.

All intra-group transactions, balances, income and expenses are eliminated on consolidation.

Minority interests in the net assets of consolidated subsidiaries are presented separately from the Group's equity therein. Minority interests in the net assets consist of the amount of those interests at the date of the original business combination and the minority's share of changes in equity since the date of the combination. Losses applicable to the minority in excess of the minority's interest in the subsidiary's equity are allocated against the interests of the Group except to the extent that the minority has a binding obligation and is able to make an additional investment to cover the losses.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Investments in subsidiaries

Investments in subsidiaries are included in the Company's balance sheet at cost less any identified impairment loss. Results of subsidiaries are accounted for by the Company on the basis of dividends received or receivable during the year.

Interests in associates

An associate is an entity, in which the Group has significant influence, but not control or joint control. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or jointly control over those policies.

The results and assets and liabilities of associates are incorporated in the consolidated financial statements using the equity method of accounting. Under the equity method, investments in associates are carried in the consolidated balance sheet at cost as adjusted for post-acquisition changes in the Group's share of the profit or loss and of changes in equity of the associate, less any identified impairment loss. When the Group's share of losses of an associate equals or exceeds its interest in that associate, the Group discontinues recognising its share of further losses. An additional share of losses is provided for and a liability is recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of that associate.

Where a group entity transacts with an associate of the Group, unrealised profits and losses are eliminated to the extent of the Group's interest in the associate, except to the extent that unrealised losses provide evidence of an impairment of the asset transferred, in which case, the full amount of losses is recognised.

Interests in jointly controlled entities

Joint venture arrangements that involve the establishment of a separate entity in which venturers have joint control over the economic activity of the entity are referred to as jointly controlled entities.

The results and assets and liabilities of jointly controlled entities are incorporated in the consolidated financial statements using the equity method of accounting. Under the equity method, investments in jointly controlled entities are carried in the consolidated balance sheet at cost as adjusted for post-acquisition changes in the Group's share of the profit or loss and of changes in equity of the jointly controlled entities, less any identified impairment loss. When the Group's share of losses of a jointly controlled entity equals or exceeds its interest in that jointly controlled entity (which includes any long-term interests that, in substance, form part of the Group's net investment in the jointly controlled entity), the Group discontinues recognising its share of further losses. An additional share of losses is provided for and a liability is recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of that jointly controlled entity.

When a group entity transacts with a jointly controlled entity of the Group, unrealised profits or losses are eliminated to the extent of the Group's interest in the jointly controlled entity, except to the extent that unrealised losses provide evidence of an impairment of the asset transferred, in which case, the full amount of losses is recognised.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Investment properties

On initial recognition, investment properties are measured at cost, including any directly attributable expenditure. Subsequent to initial recognition, investment properties are measured using the fair value model. Gains or losses arising from changes in the fair value of investment property are included in profit or loss for the period in which they arise.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use or no future economic benefits are expected from its disposals. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement in the year in which the item is derecognised.

Property, plant and equipment

Property, plant and equipment are stated at cost less subsequent accumulated depreciation and any identified impairment loss.

Depreciation is provided to write off the cost of the assets over their estimated useful lives, and after taking into account their estimated residual value, using the straight-line method.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the term of the relevant lease.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the income statement in the year in which the item is derecognised.

Leasehold land held for undetermined future use

Leasehold land held for undetermined future use is regarded as held for capital appreciation purpose and classified as an investment property, and carried at fair value. Changes in fair value of the leasehold land are recognised directly in profit or loss for the period in which changes take place.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use or no future economic benefits are expected from its disposals. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the consolidated income statement in the year in which the item is derecognised.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Owner-occupied leasehold interest in land

The land and buildings elements of a lease of land and buildings are considered separately for the purposes of lease classification. The leasehold interests in land are classified as prepaid lease payments under operating leases, which are carried at cost and amortised over the lease term on a straight-line basis.

Impairment

At each balance sheet date, the Group reviews the carrying amounts of its assets to determine whether there is any indication that those assets have suffered an impairment loss. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised as an expense immediately.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised as income immediately.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is calculated using first-in, first-out method.

Share-based payment transactions

The fair value of services received determined by reference to the fair value of share options granted at the grant date is expensed on a straight-line basis over the vesting period, with a corresponding increase in equity (share option reserve).

At each balance sheet date, the Group revises its estimates of the number of options that are expected to ultimately vest. The impact of the revision of estimates, if any, is recognised in profit or loss with a corresponding adjustment to share option reserve.

At the time when the share options are exercised, the amount previously recognised in share option reserve will be transferred to share premium. When the share options are forfeited after the vesting date or are still not exercised at the expiry date, the amount previously recognised in share option reserve will be transferred to retained profits.

Revenue recognition

Sales of merchandise are recognised when goods are delivered and title has passed.

Proceeds from sale of securities are recognised on a trade date upon the execution of a binding sale agreement.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Revenue recognition (continued)

Dividend income from investments is recognised when the Group's right to receive payment has been established.

Interest income from a financial asset is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount.

Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Group as lessor

Rental income from operating leases is recognised in the income statement on a straight-line basis over the term of the relevant lease.

The Group as lessee

Assets held under finance leases are recognised as assets of the Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation. Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are charged directly to profit or loss.

Rentals payable under operating leases are charged to profit or loss on a straight-line basis over the term of the relevant lease. Benefits received and receivable as an incentive to enter into an operating lease are recognised as a reduction of rental expense over the lease term on a straight-line basis.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Foreign currencies

In preparing the financial statements of each individual group entity, transactions in currencies other than the functional currency of that entity (foreign currencies) are recorded in its functional currency (i.e. the currency of the primary economic environment in which the entity operates) at the rates of exchanges prevailing on the dates of the transactions. At each balance sheet date, monetary items denominated in foreign currencies are retranslated at the rates prevailing on the balance sheet date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on the translation of monetary items, are recognised in profit or loss in the period in which they arise. Exchange differences arising on the retranslation of non-monetary items carried at fair value are included in profit or loss for the period except for differences arising on the retranslation of non-monetary items in respect of which gains and losses are recognised directly in equity, in which cases, the exchange differences are also recognised directly in equity.

For the purposes of presenting the consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into the presentation currency of the Group (i.e. Hong Kong dollars) at the rate of exchange prevailing at the balance sheet date, and their income and expenses are translated at the average exchange rates for the year, unless exchange rates fluctuate significantly during the period, in which case, the exchange rates prevailing at the dates of transactions are used. Exchange differences arising, if any, are recognised as a separate component of equity (the exchange reserve). Such exchange differences are recognised in profit or loss in the period in which the foreign operation is disposed of.

Taxation

Taxation represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes income statement items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is recognised on differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Taxation (continued)

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Retirement benefit costs

Payments to defined contribution retirement benefits plans or the Mandatory Provident Fund schemes are charged as an expense when employees have rendered service entitling them to the contributions.

Borrowing costs

All borrowing costs are recognised as, and included in, finance costs in the income statement in the period in which they are incurred.

Financial instruments

Financial assets and financial liabilities are recognised on the balance sheet when a group entity becomes a party to the contractual provisions of the instrument. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets held for trading) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets held for trading are recognised immediately in profit or loss.

Financial assets

The Group's financial assets are classified into one of the three categories, including financial assets held for trading, loans and receivables, and available-for-sale financial assets. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace. The accounting policies adopted in respect of each category of financial assets are set out below:

Financial assets held for trading

At each balance sheet date subsequent to initial recognition, financial assets at held for trading (including derivatives assets) are measured at fair value, with changes in fair value recognised directly in profit or loss in the period in which they arise.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial assets (continued)

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. At each balance sheet date subsequent to initial recognition, loans and receivables (including trade and other receivables, amount due from an associate, amount due from a minority shareholder, amounts due from related companies, deposits held at financial institutions, bank deposits and bank balances) are carried at amortised cost using the effective interest method, less any identified impairment losses. An impairment loss is recognised in profit or loss when there is objective evidence that the asset is impaired, and is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate. Impairment losses are reversed in subsequent periods when an increase in the asset's recoverable amount can be related objectively to an event occurring after the impairment was recognised, subject to a restriction that the carrying amount of the asset at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated or not classified as any of financial assets at fair value through profit or loss or loan and receivables. At each balance sheet date subsequent to initial recognition, available-for-sale financial assets are measured at fair value. Changes in fair value are recognised in equity, until the financial asset is disposed of or is determined to be impaired, at which time, the cumulative gain or loss previously recognised in equity is removed from equity and recognised in profit or loss. Any impairment losses on available-for-sale financial assets are recognised in profit or loss. Impairment losses on available-for-sale equity investments will not reverse in subsequent periods.

Investment in convertible notes

Convertible notes are regarded as hybrid instruments, consisting of a debt component and embedded derivative components. At the date of acquisition, the fair value of the debt component is estimated using the prevailing market interest rate for similar non-convertible debt and is recognised as an available-for-sale financial asset. The fair value of the embedded derivative components are calculated using the Black-Scholes pricing model. The gain arising from excess of fair value (determined at initial recognition using valuation techniques whose variables were not based solely on observable market data) over the cost of acquisition of the convertible notes at the date of acquisition (gain on initial recognition) is credited to the carrying amount of the convertible notes. The gain on initial recognition is recognised in profit or loss over the maturity period of the convertible notes on a straight line basis. On derecognition or disposal of the convertible notes, the unamortised portion of the gain on initial recognition is recognised in profit or loss.

For the year ended 31st December, 2006

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial assets (continued)

Investment in convertible notes (continued)

At each balance sheet date subsequent to initial recognition, the convertible notes are measured at fair value. Changes in fair value of the debt component of the convertible notes are recognised in equity, until the instruments are disposed of or are determined to be impaired, at which time, the cumulative gain or loss previously recognised in equity is removed from equity and recognised in profit or losses. Changes in fair value of the embedded derivative components of the convertible notes are recognised directly in profit or loss in the period in which they arise.

The interest income on the debt component of convertible notes is calculated using the effective interest rate to the debt component (excluding the gain on initial recognition).

Financial liabilities and equity

Financial liabilities and equity instruments issued by a group entity are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

An equity instrument is any contract that evidences a residual interest in the assets of the group entity after deducting all of its liabilities. Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

The Group's financial liabilities (including trade and other payables, amounts due to directors, amounts due to related companies, amount due to a minority shareholder, amount due to a jointly controlled entity, bank and other loans, and obligations under a finance lease) are measured at amortised cost, using the effective interest method after initial recognition.

The risks associated with these financial instruments and the policies on how to mitigate these risks are set out below:

Currency risk

Certain bank and other loans are denominated in US dollars and Japanese Yen as stated in note 34. The Group currently does not have a foreign currency hedging policy. However, the management monitors foreign exchange exposure and will consider hedging significant foreign currency exposure should the need arise.

Interest rate risk

The Group's cash flow interest rate risk relates primarily to the bank deposits and deposits held by financial institutions. Interest rate risk relating to bank and other loans is minimal due to their short term nature or at fixed interest rate. The fair value interest rate risk relate primarily to obligations under finance lease and debt component of convertible notes. The Group currently does not have an interest rate hedging policy to hedge against its exposures. However, the management closely monitors interest rate exposures and will consider entering into interest rate swap transactions to hedge significant interest rate risk should the risk arise.

Credit risk

The Group's maximum exposure to credit risk in the event of the counterparties failure to perform their obligations as at 31st December, 2006 in relation to each class of recognised financial assets is the carrying amount of those assets as stated in the consolidated balance sheet.

The Group's credit risk is primarily attributable to its trade receivables debt component of convertible notes, amounts due from related companies, amount due from minority shareholder and amount due from associate companies. The Group is exposed to concentration of credit risk as a substantial portion of its sales is generated from a limited number of customers. During the year, the top five customers of the Group accounted for about 46% (2005: 67%) of the Group's sales. The Group manages its credit risk by closely monitoring the granting of credit. The Group also reviews the recoverable amount of each individual trade receivable at each balance sheet date to ensure that adequate allowances are made for irrecoverable amounts. In this regard, the directors of the Company consider that the Group's credit risk is significantly reduced.

For the year ended 31st December, 2006

Fair value of financial instruments

The fair value of financial assets and financial liabilities are determined as follows:

The fair value of financial assets and financial liabilities with standard terms and conditions and traded on active liquid markets are determined with reference to quoted market prices.

The fair value of other financial assets and financial liabilities (excluding derivative instruments) are determined in accordance with generally accepted pricing models based on discounted cash flow analysis or using prices from observable current market transactions.

The fair value of a non-option derivative is estimated using discounted cash flow analysis and the applicable yield curve. For an option-based derivative, the fair value is estimated using option pricing model (for example, the binominal model).

The carrying amounts of the Group's major financial instruments which are carried at cost or amortised cost (including trade and other receivables, bank balances and cash, trade and other payables, amounts due from/to related companies, and bank and other loans) approximate their fair values due to their short maturity.
